About slnee

Slnee Company was established in 2010 as one of the leading national companies specializing in technical services and consulting in digital transformation. Slnee has played an essential and influential role in demonstrating the knowledge and technical strength of the Kingdom of Saudi Arabia by providing the most advanced systems and infrastructure.

The company has won many local and regional awards for its innovative projects that are compatible with the Kingdom's Vision 2030. It was also distinguished by the quality of its service by applying international and local standards. Slnee intended to provide the best solutions to its customers to achieve the best governance and institutional excellence standards. We work in Slnee to provide solutions commensurate with the client's needs, starting with consulting and finding technical solutions, and ending with technical support, through experts in the technical field and institutional excellence, and strategic partnerships with international companies, to benefit from global expertise to provide the latest technical solutions to the institutions of the Kingdom..

Business Plus System

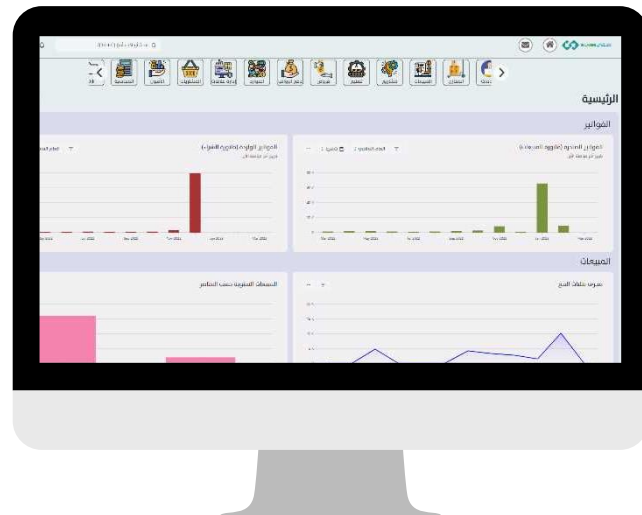

Business Plus
Enterprise Resource Planning

About System

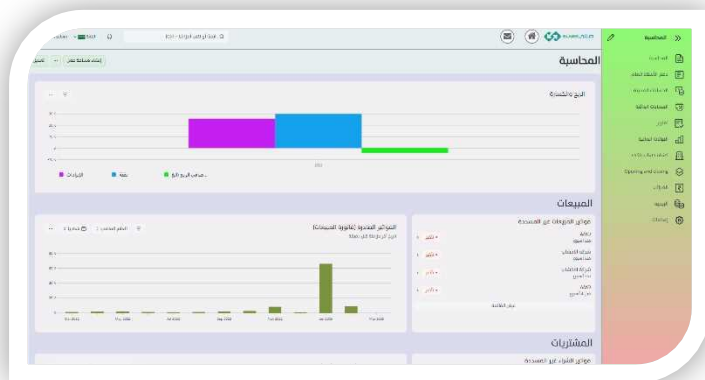

Digital investment and further progress in the industrial sector, contribute to our planning for the future and our vision of the current developments.

Slnee is proud to present the Business Plus smart resource planning system for facility digitization, which is an open-source electronic system that helps our customers manage their operational processes in a sound and effective manner required for all departments including human and financial resources, procurement, and project management.

System Properties
