SLNEE صلني
رواد الحلول الذكية

The Slnee company is pleased to offer the intelligent resource planning system (SERP) to the government sector, which is one of the technological products that contribute to achieving digital transformation in line with the Kingdom's Vision 2030.

This contributes to the development of the national economy and the development of local technical content.

It is a comprehensive application system for managing the business and daily activities of government agencies, including many applications that work with high integration and are linked together by a central database, such as human resources management, finance, budgeting, procurement, and warehouses.

In addition, the system provides support services such as performance measurement, maintenance, and upgrades. The resource planning system enables organizations to organize and manage many applications needed by any government organization to efficiently organize its work, facilitate daily tasks, and make important administrative
